

Requirement Gathering – Initial Client Meeting

1. Meeting Objective

The purpose of this meeting is to understand the business needs and expectations for the Cravio online food delivery platform. The Business Analyst will gather information about the target users, business processes, key features, customer journey, restaurant operations, delivery process, and business goals.

2. Participants

- **Business Owner / Product Owner** – Defines business goals, priorities, and product vision.
- **Business Analyst** – Conducts requirement gathering, analysis, and documentation.
- **Restaurant Representative** – Provides requirements related to restaurant operations and order management.
- **Delivery Operations Representative** – Provides requirements related to delivery assignment and tracking.
- **Technical Lead / Developer Representative** – Provides technical input and feasibility feedback.

3. Business Questions

- Who are the primary users of the Cravio platform?
- How will customers register and log in?
- How will customers find and select restaurants?
- What information should be displayed for each restaurant and food item?
- How should customers search and filter food or restaurants?
- What should happen when a customer adds food to the cart?
- What payment methods should be supported?
- How should customers track their orders?
- What order statuses should customers see?
- How will restaurants receive and manage new orders?
- How will delivery partners receive delivery assignments?
- What notifications should be sent to customers?
- What should happen if an order is cancelled?
- What should happen if a restaurant rejects an order?
- What business reports or dashboards will be required?

4. Client Responses

Customer & Platform

- **Primary Users:** Customers, Restaurant Partners, and Delivery Partners.
- Customers should be able to register and log in using their mobile number or email.
- Customers should be able to browse nearby restaurants and view menus, prices, ratings, and availability.
- Customers should be able to search and filter restaurants or food items.

Ordering & Payment

- Customers should be able to add food items to a cart, modify quantities, and place an order.
- The platform should support online payment and Cash on Delivery.
- Customers should receive an order confirmation after successful order placement.

Order Tracking

- Customers should be able to track orders through statuses such as **Order Placed → Confirmed → Preparing → Picked Up → Out for Delivery → Delivered**.
- Customers should receive notifications for important order-status changes.

Restaurant & Delivery

- Restaurants should receive new orders through the platform and be able to accept or reject them.
- Restaurants should be able to update order status and manage menu items.
- Delivery partners should receive delivery assignments and update delivery status.

Exceptions

- Customers should be able to cancel an order according to the cancellation policy.
- If a restaurant rejects an order, the customer should be notified and the order should be handled according to the defined business rules.

Reporting

- The business owner should have access to basic reports such as orders, revenue, restaurant performance, and delivery performance.

5. Identified Requirements

Business Requirements

- **BR-01:** Provide customers with a convenient digital food-ordering experience.
- **BR-02:** Enable restaurants to manage online orders efficiently.

- **BR-03:** Streamline coordination between customers, restaurants, and delivery partners.
- **BR-04:** Provide visibility into order and delivery status.
- **BR-05:** Provide business performance information through basic reports.

Functional Requirements

- **FR-01:** The system shall allow customers to register and log in using mobile number or email.
- **FR-02:** The system shall allow customers to browse available restaurants.
- **FR-03:** The system shall display restaurant menus, prices, ratings, and item availability.
- **FR-04:** The system shall allow customers to search and filter restaurants and food items.
- **FR-05:** The system shall allow customers to add, remove, and modify items in the cart.
- **FR-06:** The system shall allow customers to place food orders.
- **FR-07:** The system shall support online payment and Cash on Delivery.
- **FR-08:** The system shall provide order confirmation after successful order placement.
- **FR-09:** The system shall allow customers to track order status.
- **FR-10:** The system shall allow restaurants to accept or reject orders.
- **FR-11:** The system shall allow restaurants to manage menu items and update order status.
- **FR-12:** The system shall allow delivery partners to receive delivery assignments.
- **FR-13:** The system shall allow delivery partners to update delivery status.
- **FR-14:** The system shall send notifications for important order-status changes.
- **FR-15:** The system shall support order cancellation according to defined business rules.
- **FR-16:** The system shall provide basic business reports for authorized users.

6. Open Questions / Action Items
