

UML Diagram

UML diagrams were created to visually represent the behaviour, structure and interactions of the Cravio system.

1. Use Case Diagram

Purpose

The Use Case Diagram represents the major interactions between system users and the Cravio platform.

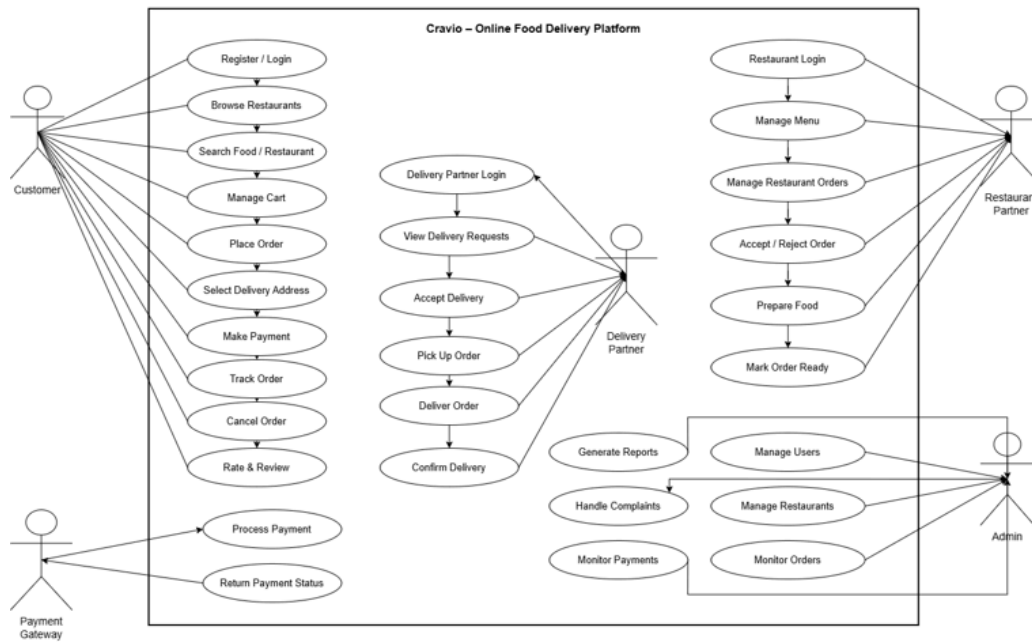

Main Actors

- Customer
- Restaurant Partner
- Delivery Partner
- Admin
- Payment Gateway

Key Use Cases

- Register/Login
- Browse Restaurants
- Place Order
- Make Payment
- Track Order
- Manage Menu
- Manage Orders
- Deliver Order

Cravio – Online Food Delivery Platform UML Use Case Diagram

2. Activity Diagram

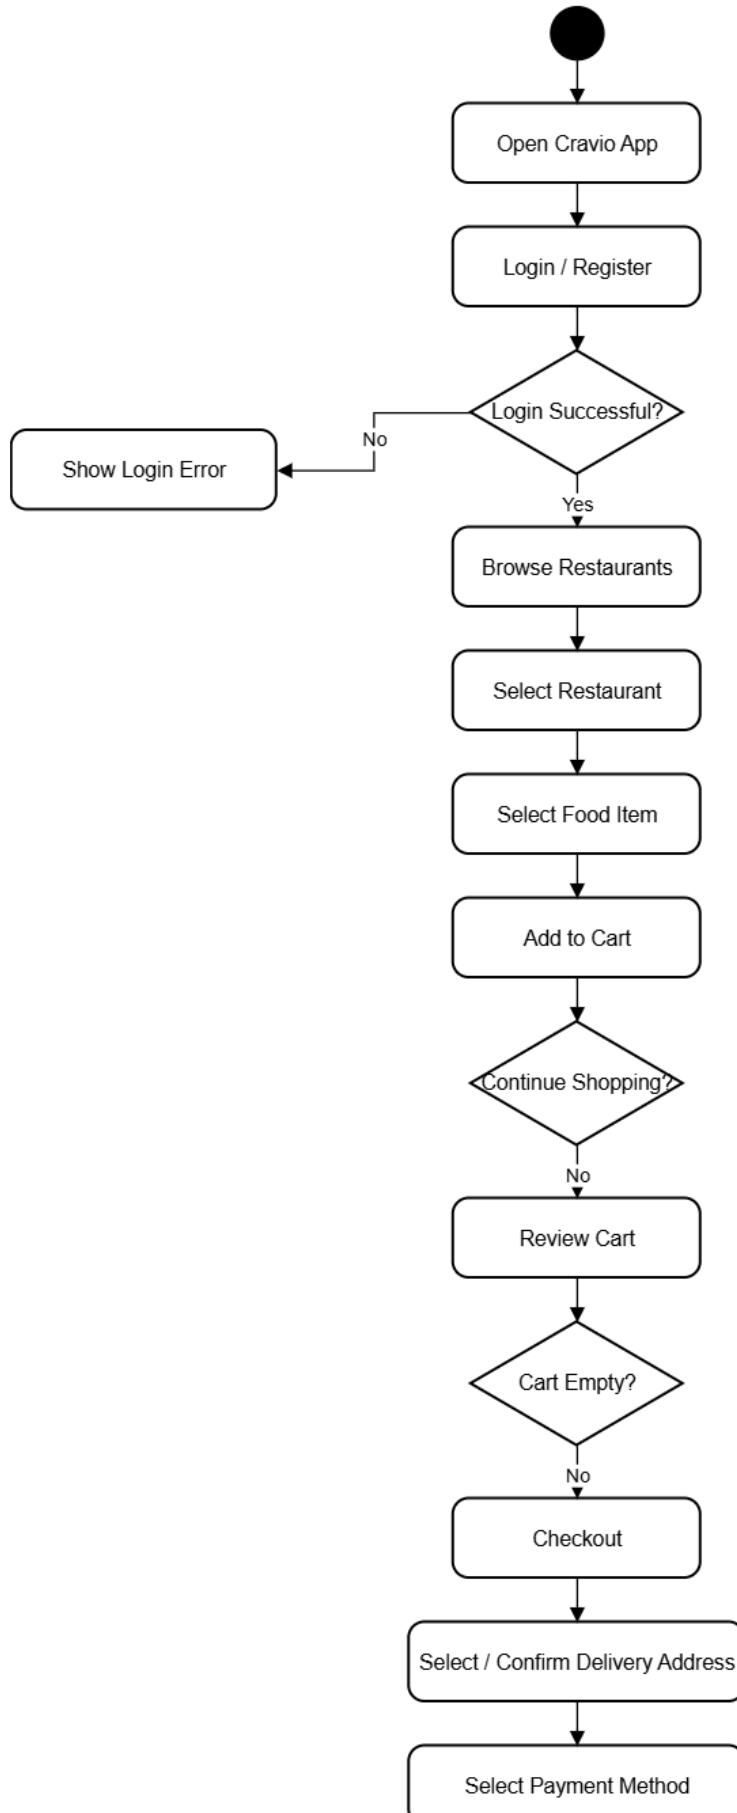

Purpose

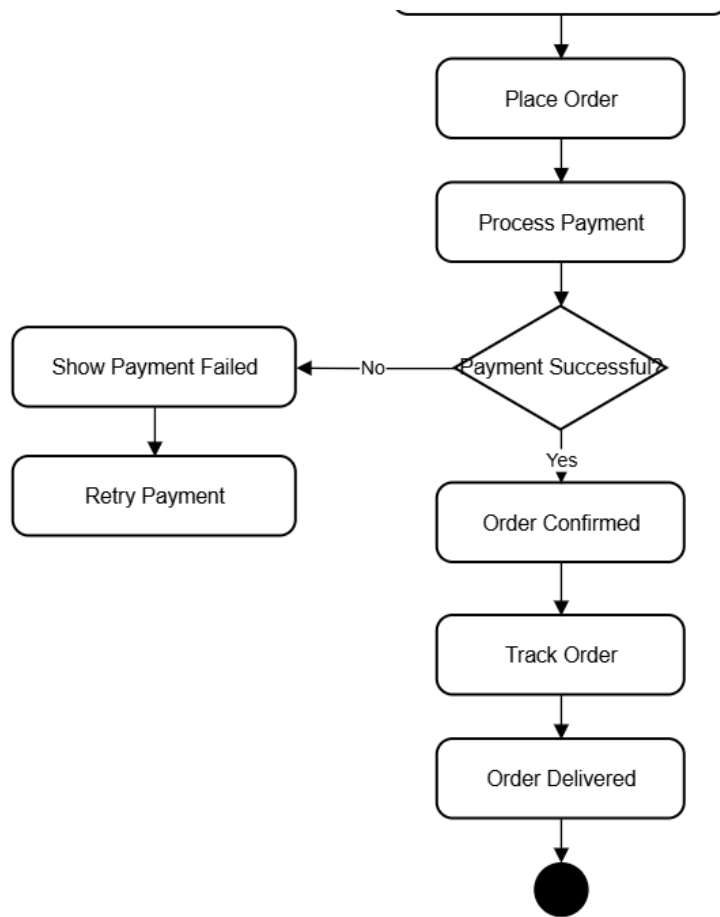

The Activity Diagram represents the step-by-step workflow of the Cravio order process.

Main Flow

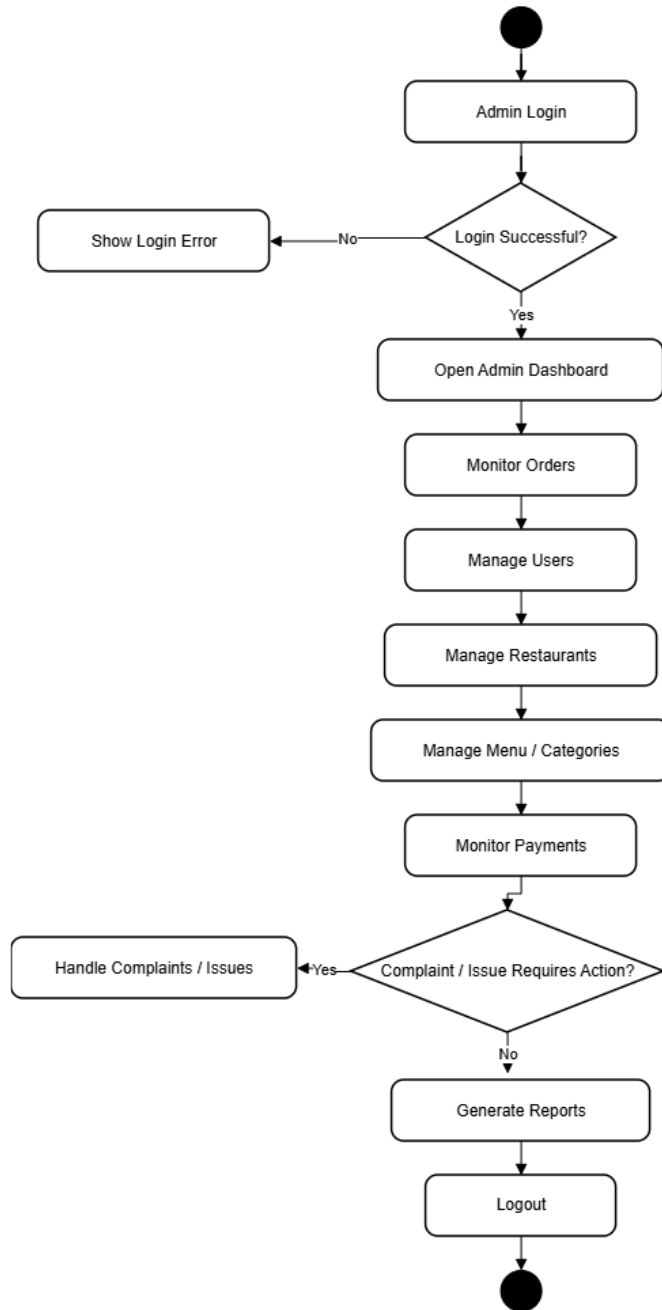

Customer Login → Browse Restaurant → Select Food → Add to Cart → Place Order → Payment
→ Restaurant Processing → Delivery → Order Completion

Cravio – Customer Order Activity Diagram

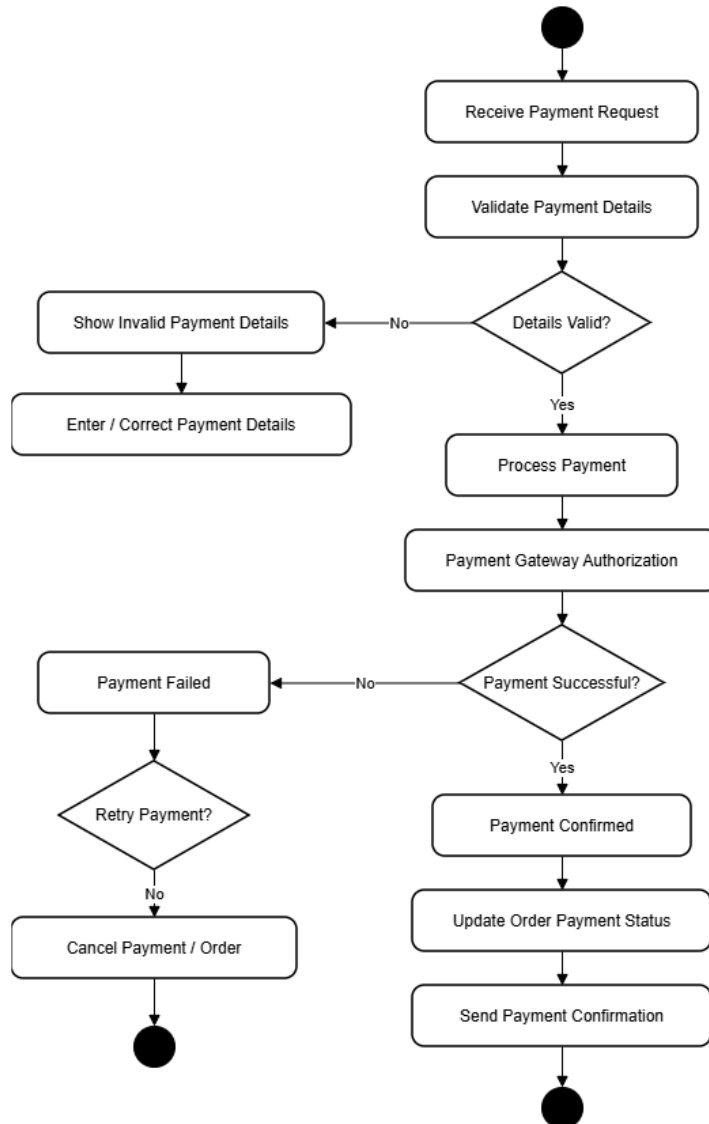

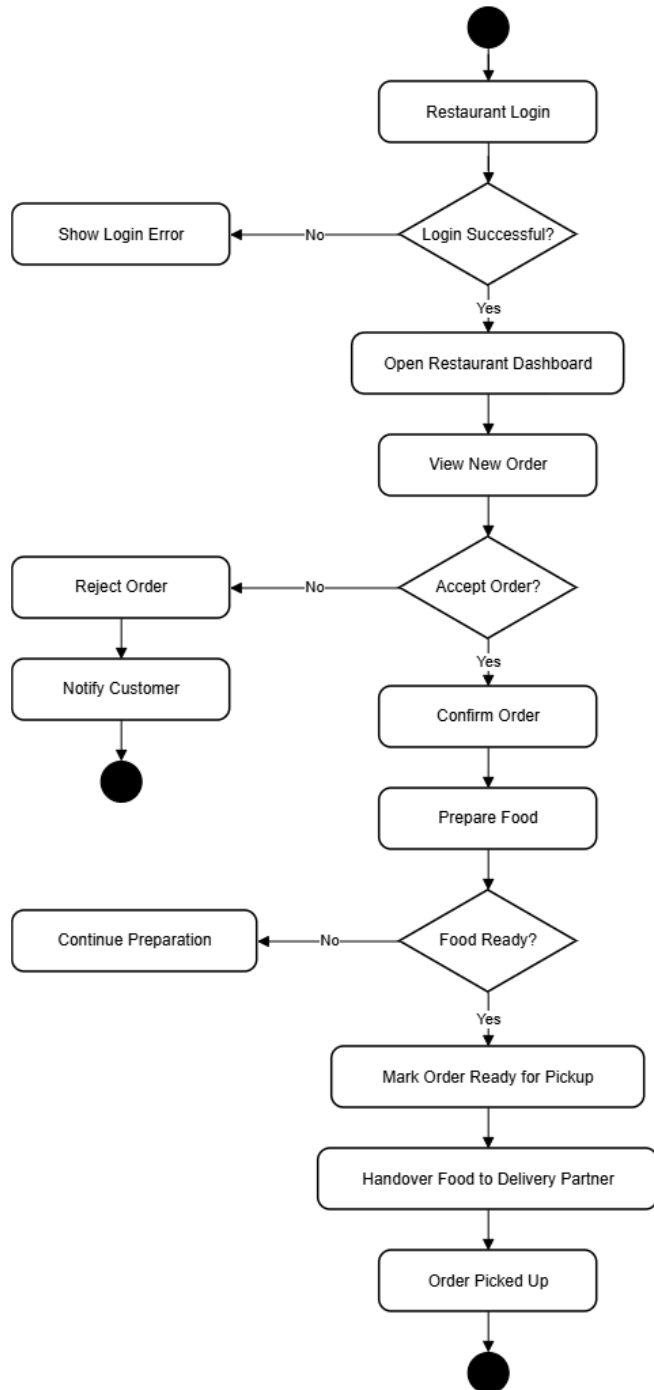

Cravio – Admin Activity Diagram

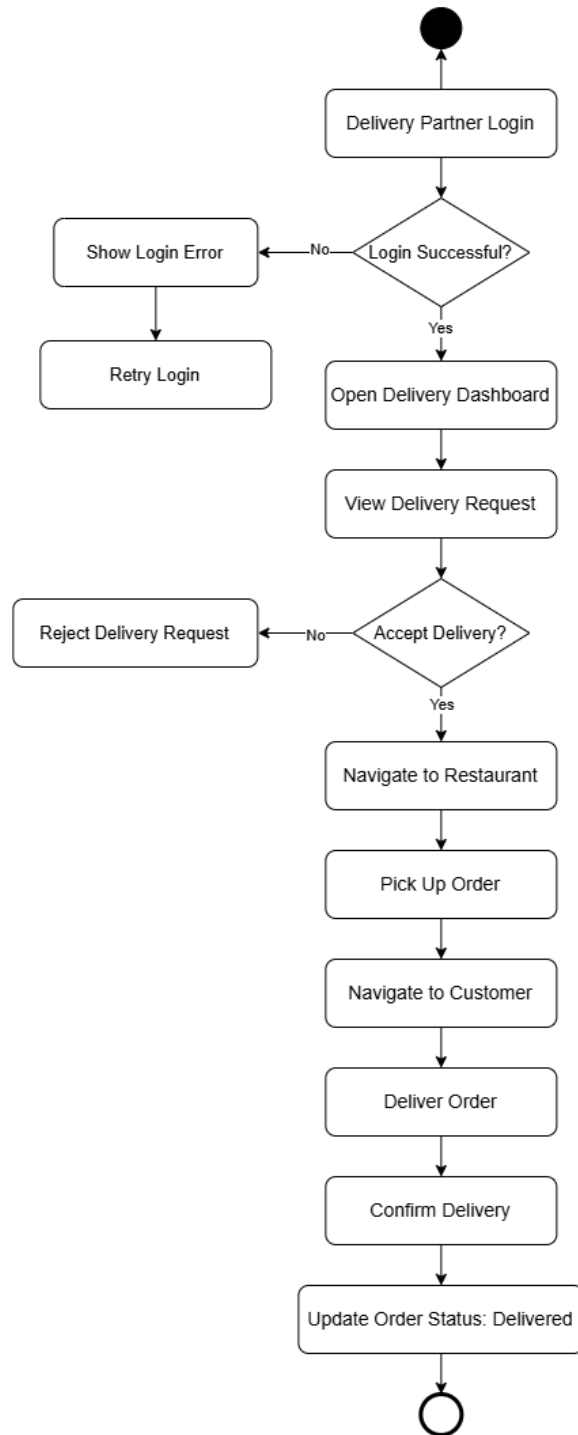

Cravio – Payment Activity Diagram

Cravio – Restaurant Partner Activity Diagram

Cravio – Delivery Partner Activity Diagram

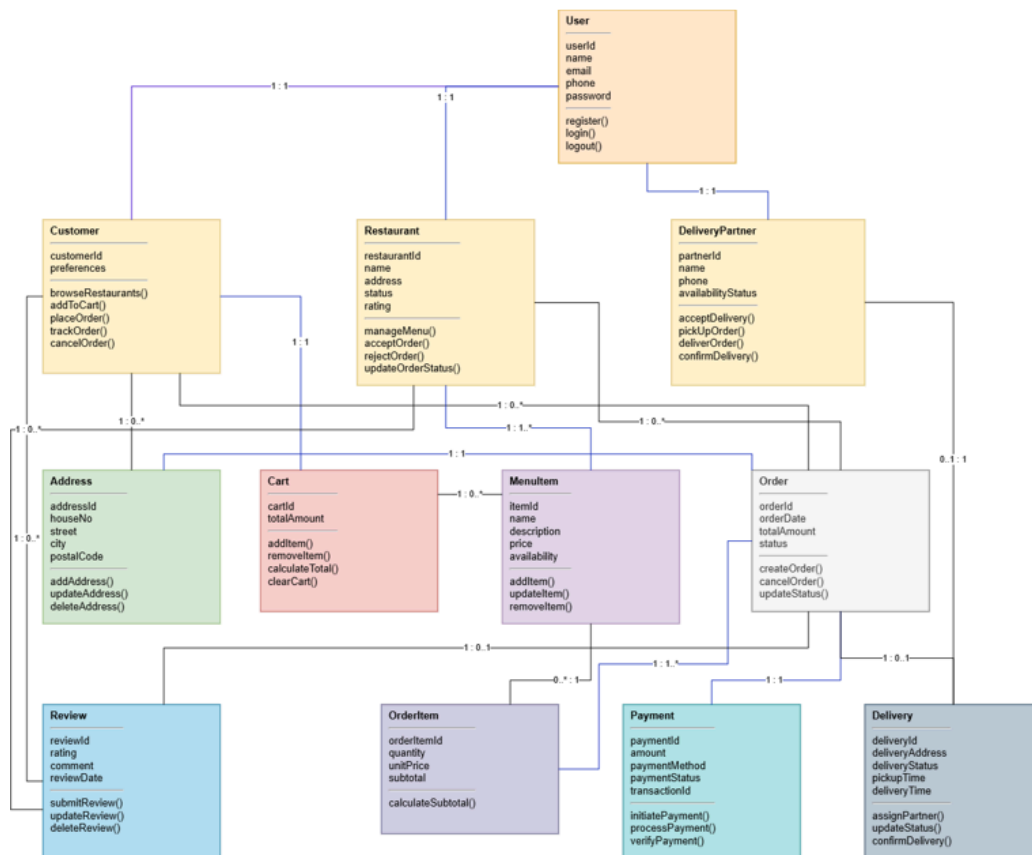

3. Class Diagram

Purpose

The Class Diagram represents the main system entities/classes, their attributes, methods and relationships.

Major Classes

- User
- Customer
- Restaurant
- MenuItem
- Cart
- Order
- OrderItem
- Payment
- Delivery
- DeliveryPartner
- Review
- Address

4. Sequence Diagram

Purpose

The Sequence Diagram shows how different system components interact during the order placement and delivery process.

Main Participants

Customer → Cravio System → Restaurant → Payment Gateway → Delivery Partner
