

FRD – Functional Requirements Document

1. Document Information

Field	Details
Project Name	Cravio – Online Food Delivery Platform
Document Name	Functional Requirements Document (FRD)
Document Version	1.0
Prepared By	Rahul Kumar (Business Analyst)
Date	11 September 2026
Status	Draft

2. System Overview

Cravio is a digital food delivery platform that enables customers to browse restaurants, select food items, place orders, make payments, and track deliveries.

The system will provide separate functionalities for customers, restaurant partners, delivery partners, and authorized users. This FRD defines the functional behaviour and system-level requirements needed to support these activities.

3. Functional Requirements

3.1 User Registration & Login

FR-01: The system shall allow users to register using a valid mobile number or email address.

FR-02: The system shall allow registered users to log in using their registered credentials.

FR-03: The system shall validate the entered login credentials before allowing access to the platform.

FR-04: The system shall display an appropriate error message when invalid login credentials are entered.

FR-05: The system shall prevent users from placing an order unless they are successfully logged in.

3.2 Restaurant & Menu

FR-06: The system shall display a list of available restaurants to customers.

FR-07: The system shall display restaurant details including restaurant name, rating, availability, and menu information.

FR-08: The system shall display available food items with their name, price, description, and availability status.

FR-09: The system shall allow customers to view the menu of a selected restaurant.

FR-10: The system shall prevent customers from adding unavailable food items to the cart.

3.3 Search & Discovery

FR-11: The system shall allow customers to search for restaurants or food items by name.

FR-12: The system shall display search results based on the customer's search criteria.

FR-13: The system shall allow customers to filter restaurants or food items based on available filtering options.

FR-14: The system shall display an appropriate message when no matching search results are found.

3.4 Cart Management

FR-15: The system shall allow customers to add available food items to the cart.

FR-16: The system shall display the selected food items, quantity, item price, and total cart amount.

FR-17: The system shall allow customers to increase or decrease the quantity of items in the cart.

FR-18: The system shall allow customers to remove food items from the cart.

FR-19: The system shall automatically recalculate the cart total when the item quantity or cart contents are changed.

FR-20: The system shall prevent checkout when the cart is empty.

3.5 Order Placement

FR-21: The system shall allow logged-in customers to proceed to checkout from a non-empty cart.

FR-22: The system shall display the selected items, quantities, prices, delivery details, and order total before order confirmation.

FR-23: The system shall allow customers to provide or select a valid delivery address.

FR-24: The system shall validate the required order and delivery information before placing the order.

FR-25: The system shall create an order after the customer successfully confirms the order.

FR-26: The system shall generate a unique order ID for each successfully created order.

FR-27: The system shall display an order confirmation after successful order placement.

3.6 Payment

FR-28: The system shall allow customers to select an available payment method during checkout.

FR-29: The system shall support online payment and Cash on Delivery (COD), based on business rules.

FR-30: The system shall initiate the online payment process when the customer selects an online payment method.

FR-31: The system shall confirm the payment status before marking an online-paid order as successfully placed.

FR-32: The system shall display an appropriate message when an online payment fails.

FR-33: The system shall record the payment status associated with each order.

3.7 Order Tracking & Status

FR-34: The system shall display the current status of an order to the customer.

FR-35: The system shall support the order status flow: Order Placed → Confirmed → Preparing → Picked Up → Out for Delivery → Delivered.

FR-36: The system shall update the order status when an authorized restaurant or delivery partner performs the relevant status update.

FR-37: The system shall display the order status history to the customer.

FR-38: The system shall prevent unauthorized users from changing the order status.

3.8 Restaurant Order Management

FR-39: The system shall display new customer orders to the respective restaurant.

FR-40: The system shall allow authorized restaurant users to accept or reject a new order.

FR-41: The system shall update the order status based on the restaurant's accepted order actions.

FR-42: The system shall allow authorized restaurant users to update the preparation status of an accepted order.

FR-43: The system shall prevent unauthorized users from accessing or modifying restaurant orders.

3.9 Delivery Management

FR-44: The system shall assign an eligible delivery partner to an accepted order according to the configured assignment rules.

FR-45: The system shall display assigned delivery details to the respective delivery partner.

FR-46: The system shall allow the delivery partner to accept or acknowledge the assigned delivery.

FR-47: The system shall allow the delivery partner to update the delivery status during the delivery process.

FR-48: The system shall display the updated delivery status to the customer.

FR-49: The system shall prevent unauthorized users from modifying delivery status.

3.10 Notifications

FR-50: The system shall notify the customer when an order is successfully placed.

FR-51: The system shall notify the customer when the order status changes.

FR-52: The system shall notify the restaurant when a new order is received.

FR-53: The system shall notify the delivery partner when a delivery is assigned.

FR-54: The system shall notify the customer when the restaurant rejects or the system cancels an order.

FR-55: The system shall use the notification channels configured by the business.

3.11 Cancellation & Refund

FR-56: The system shall allow customers to request order cancellation when cancellation is permitted by the applicable business rules.

FR-57: The system shall validate the order status and cancellation rules before processing a cancellation request.

FR-58: The system shall update the order status when an eligible cancellation is successfully processed.

FR-59: The system shall initiate the applicable refund process for eligible prepaid orders according to the defined refund policy.

FR-60: The system shall display an appropriate message when an order cannot be cancelled.

3.12 Reporting & Access

FR-61: The system shall allow authorized users to access available business reports.

FR-62: The system shall display order-related information in the reports.

FR-63: The system shall display revenue-related information to authorized users.

FR-64: The system shall provide restaurant and delivery performance information in the relevant reports.

FR-65: The system shall restrict report access based on the user's assigned role and permissions.

4. User Roles & Permissions

Role	Primary Access
Customer	Browse restaurants, manage cart, place orders, make payments, track orders, and request eligible cancellations
Restaurant Partner	Manage restaurant information, menu availability, and received orders
Delivery Partner	View assigned deliveries and update delivery status
Authorized Business/Admin User	Access authorized reports, manage applicable system information, and control role-based access

5. Module-wise Requirements

Module	Related Requirements	Purpose
User Registration & Login	FR-01 to FR-05	User authentication and access

Restaurant & Menu	FR-06 to FR-10	Restaurant and food information
Search & Discovery	FR-11 to FR-14	Restaurant and food search
Cart Management	FR-15 to FR-20	Cart item management
Order Placement	FR-21 to FR-27	Checkout and order creation
Payment	FR-28 to FR-33	Payment processing and status
Order Tracking & Status	FR-34 to FR-38	Order status tracking
Restaurant Order Management	FR-39 to FR-43	Restaurant-side order handling
Delivery Management	FR-44 to FR-49	Delivery assignment and tracking
Notifications	FR-50 to FR-55	System notifications
Cancellation & Refund	FR-56 to FR-60	Order cancellation and refunds
Reporting & Access	FR-61 to FR-65	Authorized reports and access

6. Business Rules

BRL-01: A customer must be logged in to place an order.

BRL-02: Only available food items can be added to the cart.

BRL-03: An order must be accepted by the restaurant before it moves to the preparation stage.

BRL-04: Only authorized restaurant users can accept or reject restaurant orders.

BRL-05: Only the assigned delivery partner can update the delivery status.

BRL-06: Order cancellation shall be allowed only when the applicable cancellation conditions are satisfied.

BRL-07: Refund processing shall follow the applicable refund policy for eligible prepaid orders.

BRL-08: Only authorized users shall be able to access business reports.

BRL-09: An order shall be marked as Delivered only after the delivery process is completed.

BRL-10: Users shall only be able to access functions permitted by their assigned role.

7. Notifications Matrix

Event	Recipient	Purpose
Order Placed	Customer	Confirm successful order placement
New Order Received	Restaurant Partner	Inform restaurant about new order
Order Status Changed	Customer	Keep customer informed about order progress
Delivery Assigned	Delivery Partner	Inform delivery partner about assigned order
Order Rejected/Cancelled	Customer	Inform customer about order outcome

8. Error & Exception Handling

EH-01: The system shall display a clear error message when a user enters invalid login credentials.

EH-02: The system shall display an appropriate message when a selected food item becomes unavailable.

EH-03: The system shall display a failure message when an online payment cannot be completed.

EH-04: The system shall prevent order creation when required checkout information is missing or invalid.

EH-05: The system shall inform the customer when a restaurant rejects an order.

EH-06: The system shall inform the customer when an order cannot be cancelled due to applicable cancellation conditions.

EH-07: The system shall handle temporary system or service failures without creating duplicate orders.

EH-08: The system shall provide an appropriate message when no search results are available.

9. Non-Functional Requirements

NFR-01: The system shall provide a responsive user experience across supported web and mobile devices.

NFR-02: The system shall provide reasonable response time for common user actions under normal operating conditions.

NFR-03: The system shall protect user data and prevent unauthorized access to sensitive information.

NFR-04: The system shall use secure communication for data transmitted between users and the platform.

NFR-05: The system shall maintain reliable availability during normal business operations.

NFR-06: The system shall be scalable to support an increasing number of users, restaurants, orders, and delivery partners.

NFR-07: The system shall maintain data accuracy and consistency across order, payment, restaurant, and delivery information.

NFR-08: The system shall maintain appropriate logs for important system and transaction activities.

10. Requirement Traceability

FRD Requirement	BRD Requirement	Traceability
FR-01 to FR-05	BR-01, BR-02	User registration, login and access
FR-06 to FR-10	BR-01, BR-02	Restaurant and menu functionality
FR-11 to FR-14	BR-01, BR-02	Search and discovery
FR-15 to FR-20	BR-02	Cart management
FR-21 to FR-27	BR-01, BR-02	Order placement
FR-28 to FR-33	BR-06	Payment functionality

FR-34 to FR-38	BR-05	Order tracking
FR-39 to FR-43	BR-03	Restaurant order management
FR-44 to FR-49	BR-04, BR-05	Delivery management
FR-50 to FR-55	BR-07	Notifications
FR-56 to FR-60	BR-09	Cancellation and refund
FR-61 to FR-65	BR-08, BR-10	Reporting and access control
