

BRD – Business Requirements Document

1. Document Information

Field	Details
Project Name	Cravio – Online Food Delivery Platform
Document Name	Business Requirements Document (BRD)
Document Version	1.0
Prepared By	Business Analyst
Date	11 September 2026
Status	Draft

2. Business Requirements

- **BR-01:** The business requires a centralized platform through which customers can discover restaurants and order food online.
- **BR-02:** The business requires customers to have a simple and convenient food-ordering experience.
- **BR-03:** The business requires restaurants to efficiently manage online orders and menu information.
- **BR-04:** The business requires delivery partners to receive delivery assignments and update delivery status.
- **BR-05:** The business requires customers to receive visibility into their order status from placement to delivery.
- **BR-06:** The business requires secure and convenient payment options, including online payment and Cash on Delivery.
- **BR-07:** The business requires notifications to keep customers informed about important order updates.
- **BR-08:** The business requires basic reporting to monitor orders, revenue, restaurant performance, and delivery performance.

- **BR-09:** The platform should support defined business rules for order cancellation, refunds, delivery charges, and restaurant commissions.
- **BR-10:** The platform should provide appropriate access based on user roles and responsibilities.

3. Business Rules & Assumptions

3.1 Business Rules

- **BR-01:** A customer must be logged in before placing an order.
- **BR-02:** An order can only be placed for food items that are currently available.
- **BR-03:** A restaurant must accept an order before it moves to the preparation stage.
- **BR-04:** Only an assigned delivery partner can update the delivery status of an order.
- **BR-05:** Order cancellation and refund eligibility will depend on the defined cancellation policy and order status.
- **BR-06:** Delivery charges may vary based on the customer's delivery location and applicable business rules.
- **BR-07:** Restaurant commission will be calculated according to the agreed commission structure.
- **BR-08:** Only authorized users can access business reports and administrative information.
- **BR-09:** An order can be marked as **Delivered** only after the delivery process is completed.
- **BR-10:** Customers will receive notifications for important order-status changes.

3.2 Assumptions

- Customers are assumed to have access to a smartphone or web browser and an internet connection.
- Restaurants are assumed to have the required device and internet connection to manage online orders.
- Delivery partners are assumed to use a mobile device with location services enabled when required.
- Restaurants are assumed to maintain accurate menu, price, and item-availability information.
- Customers are assumed to provide accurate delivery details during checkout.
- A third-party payment gateway is assumed to be available for online payments.
- Delivery partners are assumed to follow the delivery instructions and service areas defined by the business.
- The initial release is assumed to focus on core food-ordering and delivery functionality.

4. Success Criteria

- Customers can successfully register, browse restaurants, place orders, and track deliveries.
- Restaurants can receive, accept/reject, and manage customer orders.
- Delivery partners can receive assignments and update delivery status.
- Customers can complete payments using the supported payment methods.
- Order-status notifications are delivered at the required stages.
- The core ordering and delivery workflow operates without critical business or functional issues.
- Authorized users can access the required business reports.
- The solution meets the agreed business requirements and stakeholder expectations.

5. Risks & Dependencies

5.1 Risks

- **R-01 – Payment Failure:** Payment gateway failure may prevent customers from completing online payments.
- **R-02 – Delivery Delays:** High order volume, traffic, weather, or limited delivery capacity may cause delays.
- **R-03 – Restaurant Availability:** Restaurants may not consistently maintain accurate menu and item-availability information.
- **R-04 – Technical Issues:** System downtime or application defects may affect ordering and delivery operations.
- **R-05 – Incorrect Customer Information:** Incorrect address or contact details may lead to unsuccessful deliveries.
- **R-06 – Data Security:** Unauthorized access or security issues could expose customer or business information.

•

5.2 Dependencies

- **D-01:** Reliable payment gateway integration.
- **D-02:** Stable internet connectivity for customers, restaurants, and delivery partners.
- **D-03:** Availability of restaurant and delivery partner services.
- **D-04:** Notification services for order updates.
- **D-05:** Location and mapping services for delivery tracking and assignment.
- **D-06:** Timely stakeholder decisions and approval of business requirements.

6. Requirement References & Traceability
