

MoM – Initial Client Requirement Meeting

1. Meeting Details

- **Project:** Cravio – Online Food Delivery Platform
- **Meeting Type:** Initial Requirement Gathering Meeting
- **Date:** 11 September 2026
- **Meeting Purpose:** Initial discussion to understand business requirements and platform expectations
- **Prepared By:** Business Analyst
- **Meeting Status:** Completed

2. Meeting Objective

The objective of the meeting was to understand the business needs, user expectations, operational processes, and key features required for the Cravio online food delivery platform. The discussion focused on customers, restaurants, delivery partners, ordering, payment, tracking, notifications, and reporting requirements.

3. Participants

- **Business Owner / Product Owner**
- **Business Analyst**
- **Restaurant Representative**
- **Delivery Operations Representative**
- **Technical Lead / Developer Representative**

4. Discussion Summary

- The team discussed the overall purpose and business goals of the Cravio platform.
- The primary users were identified as customers, restaurant partners, and delivery partners.
- Customer requirements such as registration, restaurant browsing, food search, cart management, ordering, payment, and order tracking were discussed.
- Restaurant requirements such as receiving orders, accepting/rejecting orders, menu management, and updating order status were discussed.
- Delivery partner requirements such as receiving delivery assignments and updating delivery status were discussed.
- The team discussed order-status notifications and customer communication.
- Basic business reporting requirements were discussed.

- Several business rules, including cancellation, refund, delivery charges, and delivery assignment, require further clarification.

5. Key Requirements

- Customer registration and login
- Restaurant and food browsing
- Search and filtering
- Cart management
- Food order placement
- Online payment and Cash on Delivery
- Order confirmation and tracking
- Restaurant order management
- Delivery partner assignment and status updates
- Customer notifications
- Order cancellation
- Basic business reporting

6. Decisions Made

- Cravio will be developed as a centralized online food delivery platform.
- The platform will support three primary user groups: Customers, Restaurant Partners, and Delivery Partners.
- Customers will be able to place orders through the platform and track their order status.
- Online payment and Cash on Delivery will be supported.
- Restaurants will manage incoming orders and update order status through the platform.
- Delivery partners will receive delivery assignments through the platform.
- Order-status notifications will be provided to customers.
- Agile Scrum will be used as the project development methodology.

7. Open Items / Action Items

- Finalize the cancellation and refund policy.
- Confirm the payment gateway/provider.
- Define the delivery radius and delivery charges.
- Finalize the restaurant commission structure.
- Define the delivery partner assignment rules.

- Finalize customer notification channels.
- Confirm required reports and dashboard details.
- Define user roles and access permissions.

8. Next Steps

- Business rules for cancellation, refund, delivery charges, and commission will be finalized.
- Payment gateway and notification channels will be confirmed.
- User roles and access permissions will be defined.
- Detailed business and functional requirements will be documented.
- Requirements will be reviewed and validated with stakeholders.
- The approved requirements will be used as the foundation for the BRD.
